

Item Priority List

RFP _____

Name of Firm: _____

In situations where a firm is highest ranked for multiple items the INDOT Selection Review Committee will determine selection approval order as indicated by the firm's priority list. This list will apply for Design Efficiency Factor score adjustments and for situations where a firm's capacity will limit the number of selections. If no list is provided the approval order will be by INDOT's estimate of the contract values from highest to lowest.

In the space below indicate the item numbers for which your firm is submitting next to the priority numbers below with your highest priority listed first.
